EXPERIENCE

Freelance Web Design

2017.July – 2018.Apr

Worked for WRAL Digital Solutions as a freelance contractor. Created wireframes and mockups to present to team and clients. Used WordPress, HTML, and CSS to create websites for clients.

Team Sunergy, Solar Vehicle Team

2017.Sep – 2018.July

Designed and programmed Telemetry software and interfaces. Redesigned the Team Sunergy logo, created a brand style guide, and organized a library of assets for branding. I was employed during Summer 2018 to develop and maintain telemetry software during two competitive races.

Resident Assistant

2015.Aug – 2017.May

Worked with a team of RAs and a supervisor to organize and facilitate both social and educational events for residents. Built relationships with residents and helped facilitate relationships among themselves. Worked around deadlines for projects, both on my own and collaboratively with my staff.

DGSF Website

2013.July – 2018.Mar

Designed and built website for the Doris Goedeke Scholarship Foundation in 2013. Maintained and updated the website from 2013-2017. In 2018 I proposed a redesign to address certain UX issues, which included creating mockups of the new design, and writing reviews of the issues and how my design could improve the site.
